ERRATA.

Besides a few typographical errors which the eye of the reader will naturally correct, there are two so much affecting the sense that we are unwilling they should pass without being pointed out:

Page 155, about midway, on the subject of floods, &c., read *quantity*, not *quality*.

" 224, top line, in the sketch of Judge Ware, read *fertile*, not *futile*.

The christian name of General Davis was always written, by himself and others of his times, *Parley*, and was intended so to have been put in type in this work, till too late to make the change.
